Accent Shades

“The palette in this vacation home in Hobe Sound pays tribute to the homeowners’ Scandinavian roots,” says designer Jackie Armour. “We embraced shades of red, white, and blue, with accents in deep navy and red. The views of the lush backyard and pool offered a warm contrast to the color palette inside. The result is a uniquely personal, timeless design.” jmainteriordesign.com ▶

A New Look

“The owners of this 5,000-square-foot home in West Palm Beach embarked on a renovation because they wanted a distinct Florida aesthetic in a comfortable home where they could entertain their family and friends,” says designer Jackie Armour. “The new open concept we designed integrates the kitchen, dining room, living room, and family room. We incorporated custom millwork on the high ceilings and trim detailing throughout in a soft blue color, which creates a unique and cohesive effect in these freshly designed spaces.” jmainteriordesign.com
